WHAT IS IN THE DISASTER ZONE?

Krishna Nadimpalli 1, Itismita Mohanty 2
1 Geoscience Australia, Canberra, Australia, 2 CeRAPH, University of Canberra

What information is needed for disaster governance? How to achieve national consistency in information?

- Development of natural hazards exposure information modelling framework
- Stakeholders were engaged for their collective views on information requirements for informed decision making.
- Assessed current information providers supporting disaster risk reduction.
- Analysing gaps and prepare a consistent and standardised exposure information framework
- A road map of the framework for reliable information for improved informed decision.

Gap Analysis

Australian Natural Hazards Exposure Information Framework

DISASTER RISK REDUCTION
Planning, Preparation Response, Recovery, Resilience
