
Factors Affecting Long Term Community Recovery

redcross.org.au

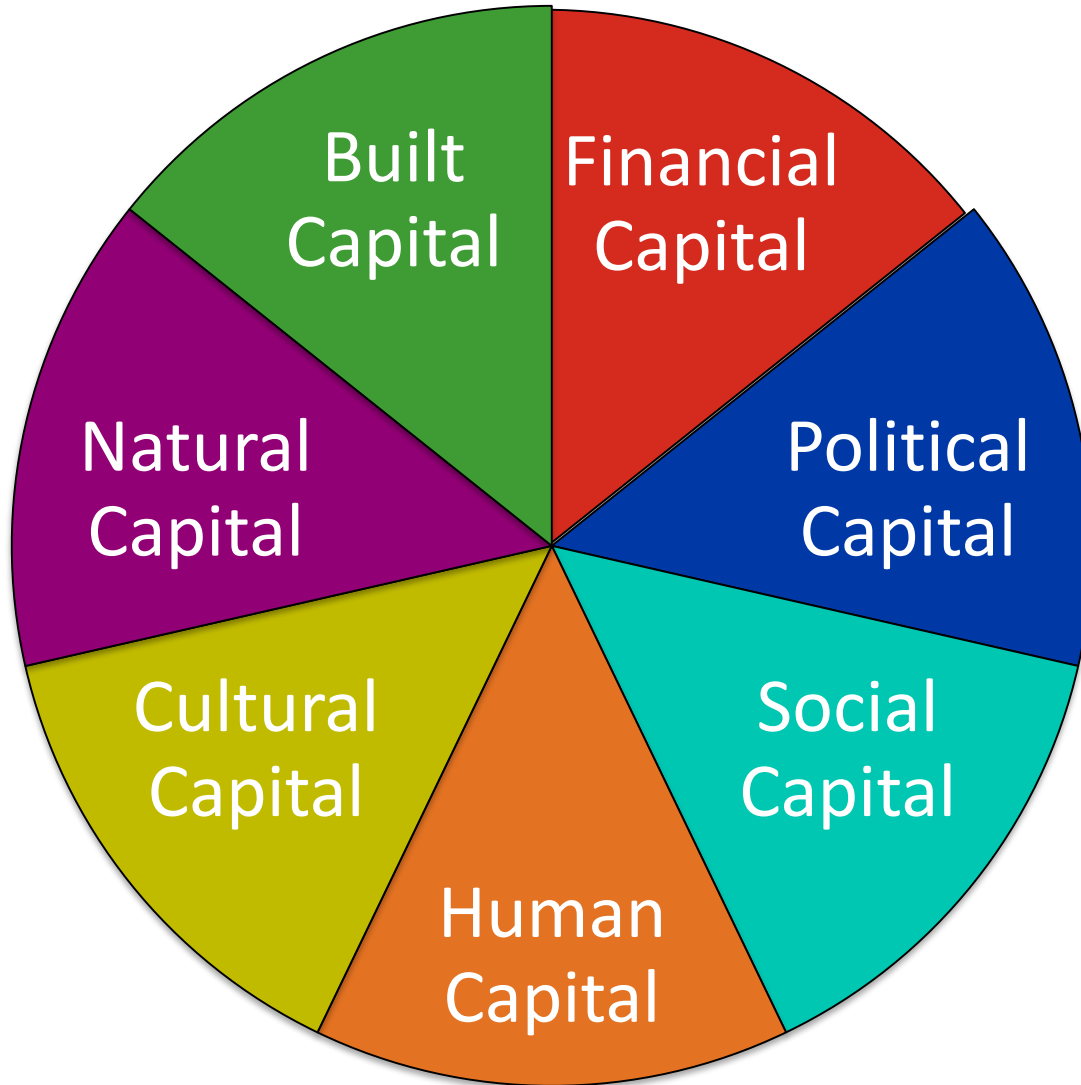

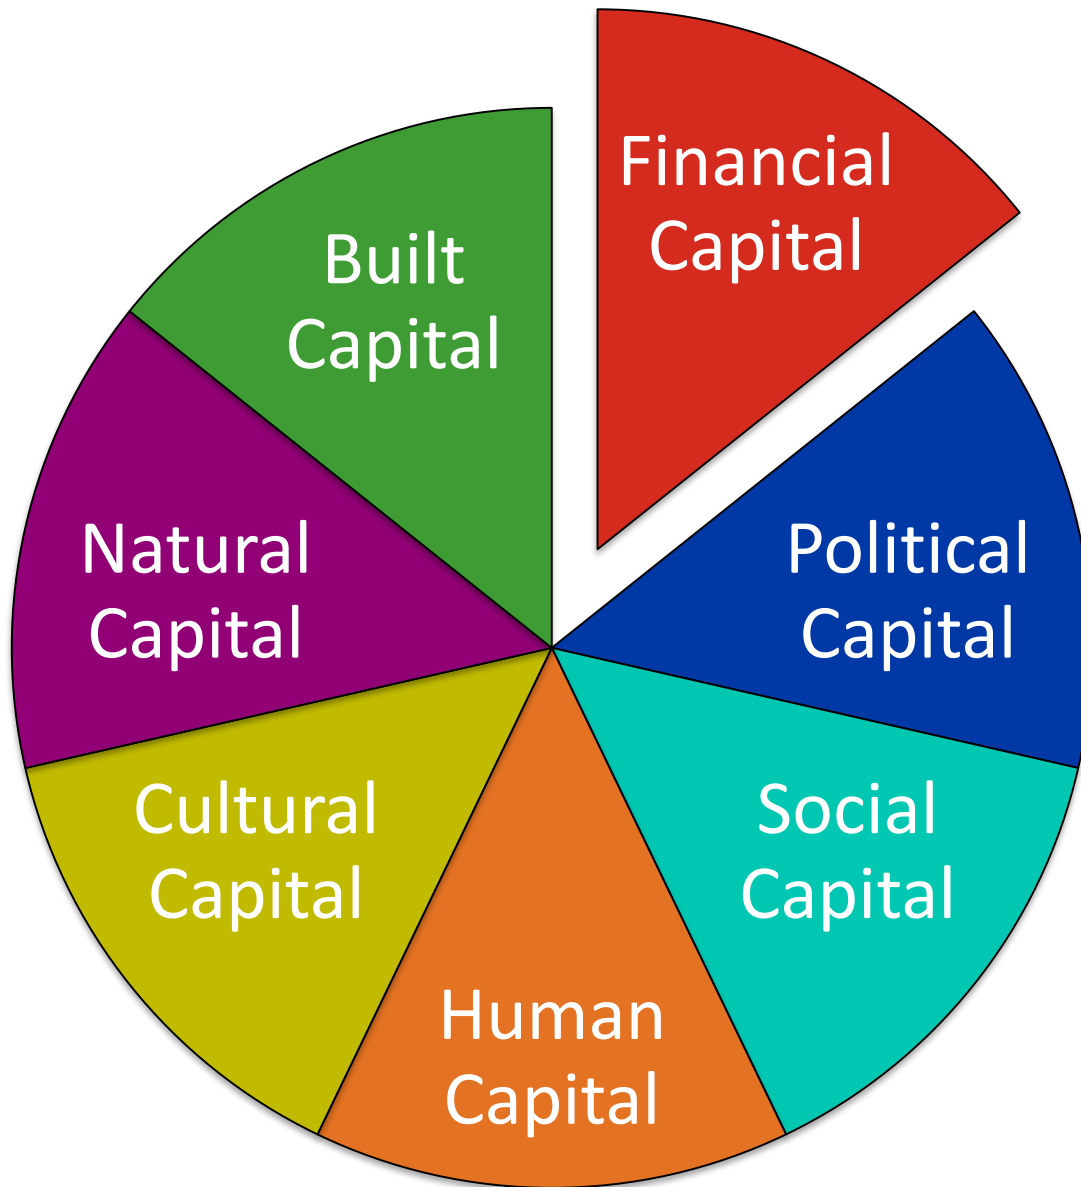

Part 1:

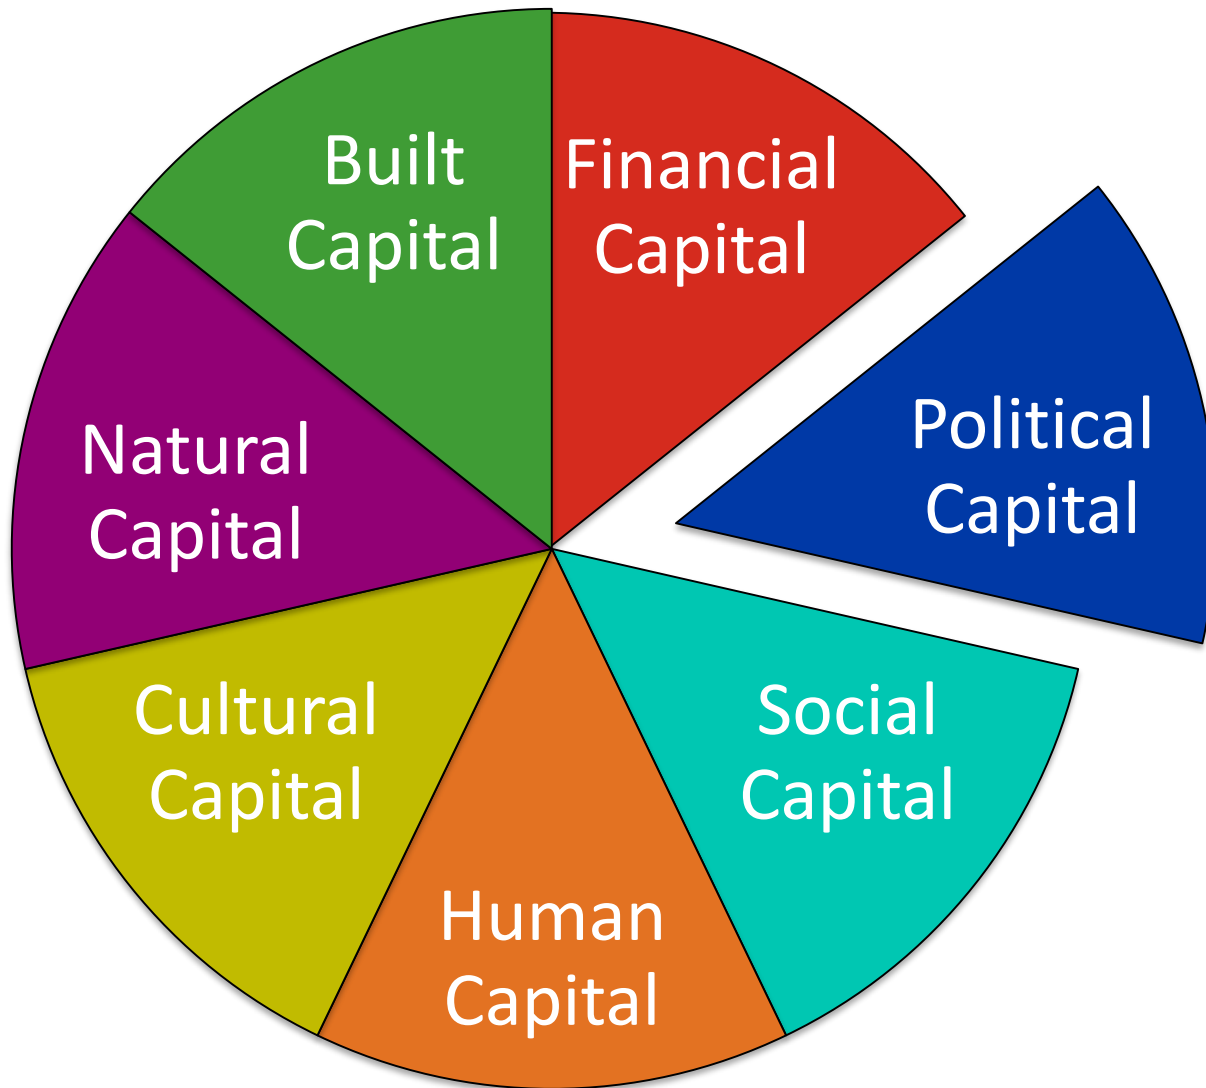

What are the barriers and enablers to successful recovery using a community capital framework?

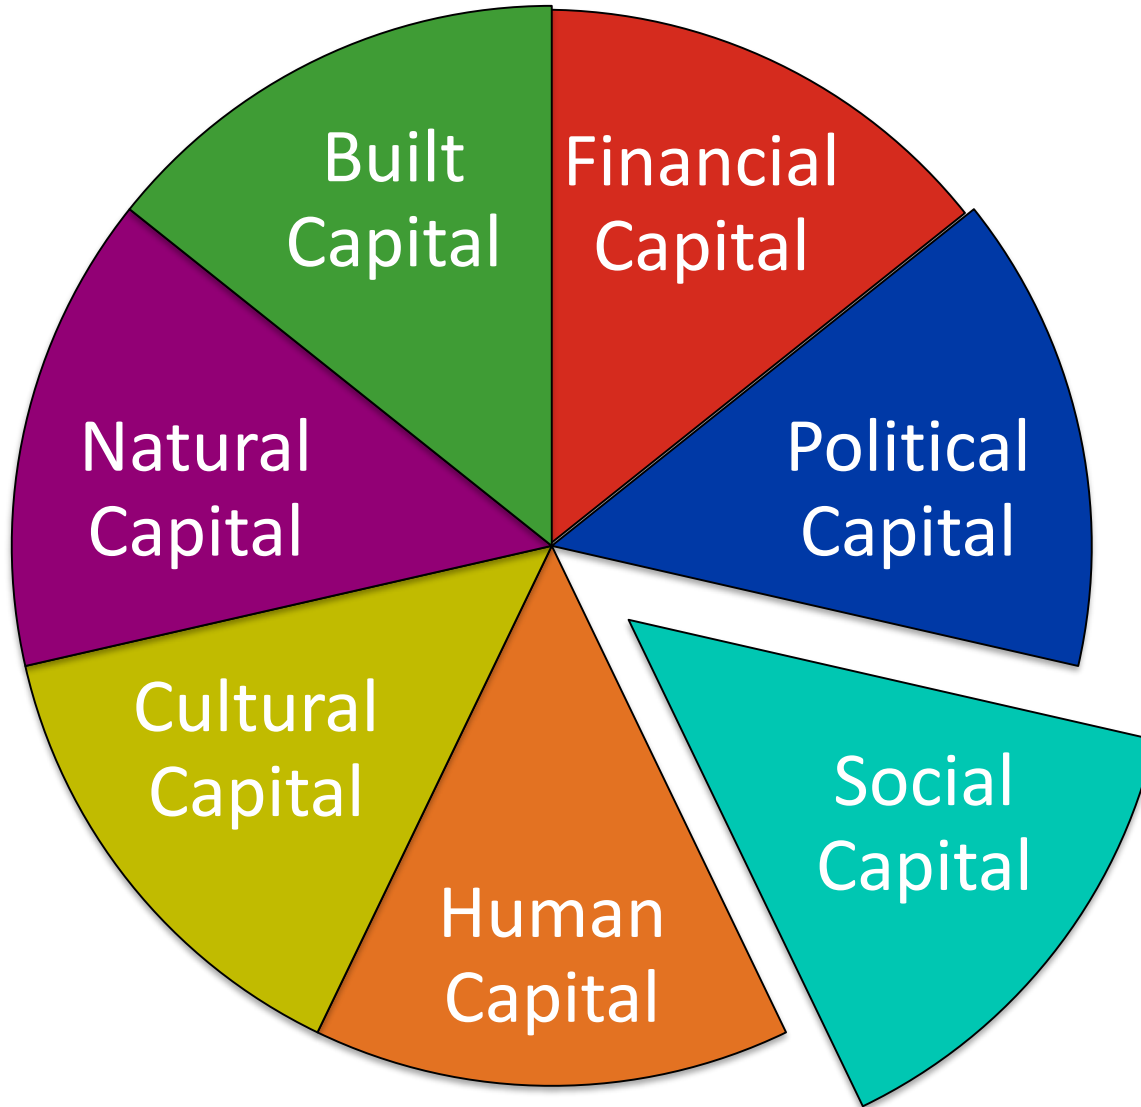

We already know there's lots of intermingled stuff that impacts recovery.

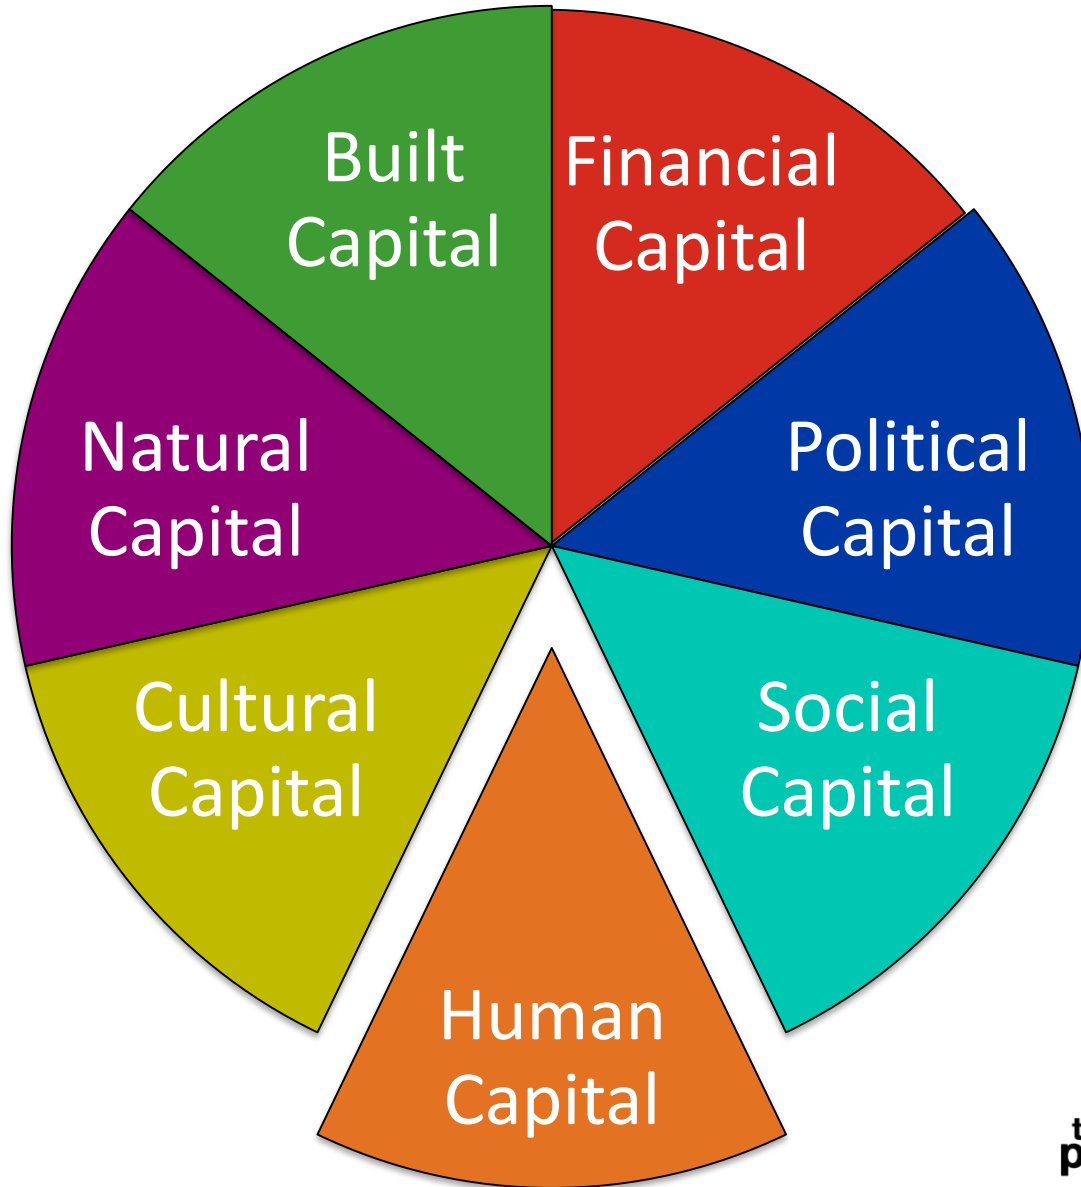

Which are the bits that help recovery and which are the bits that make it worse?

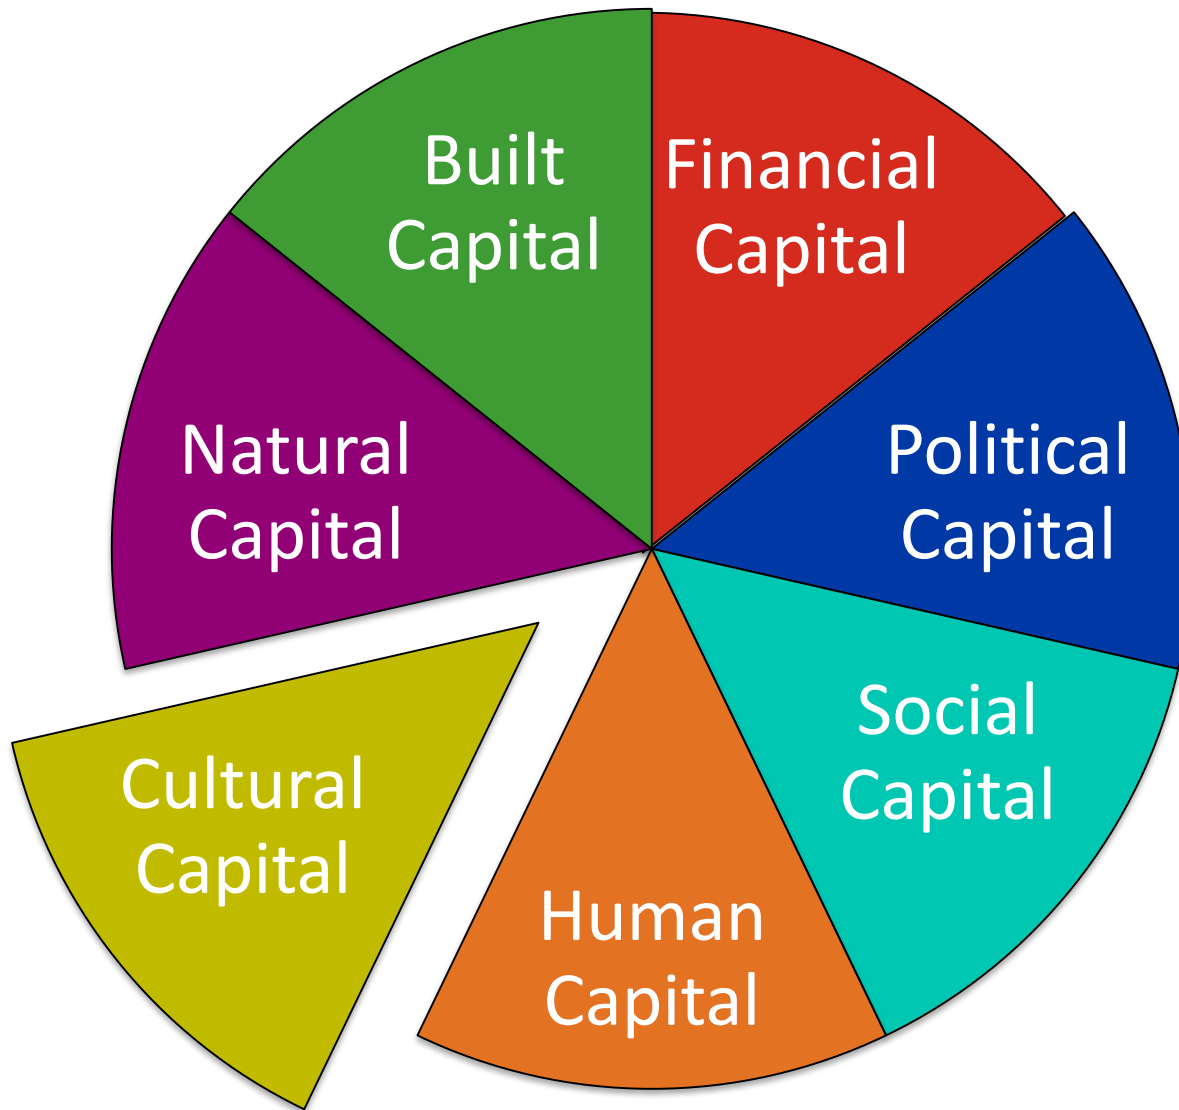

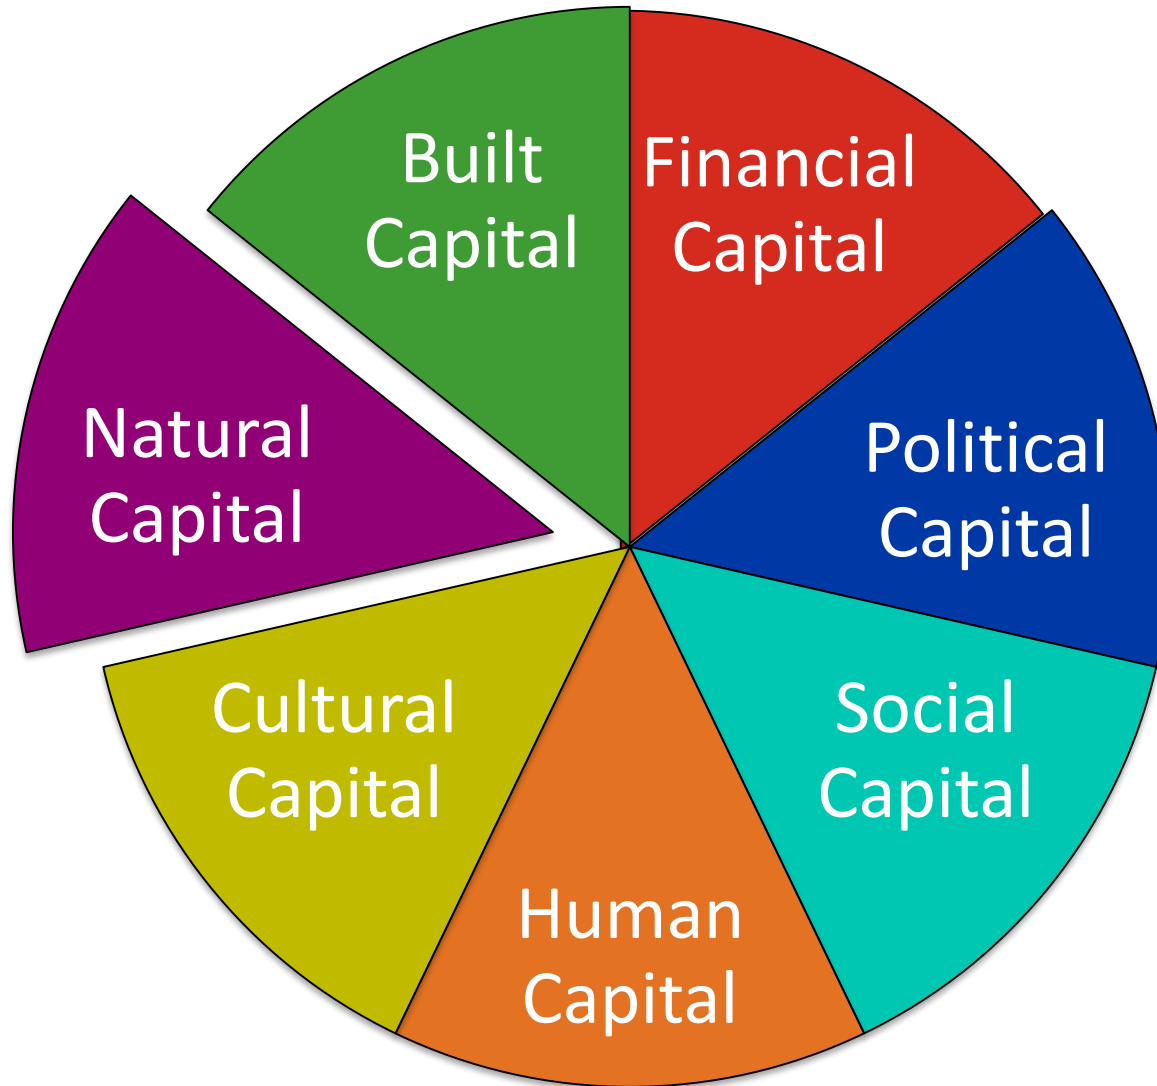

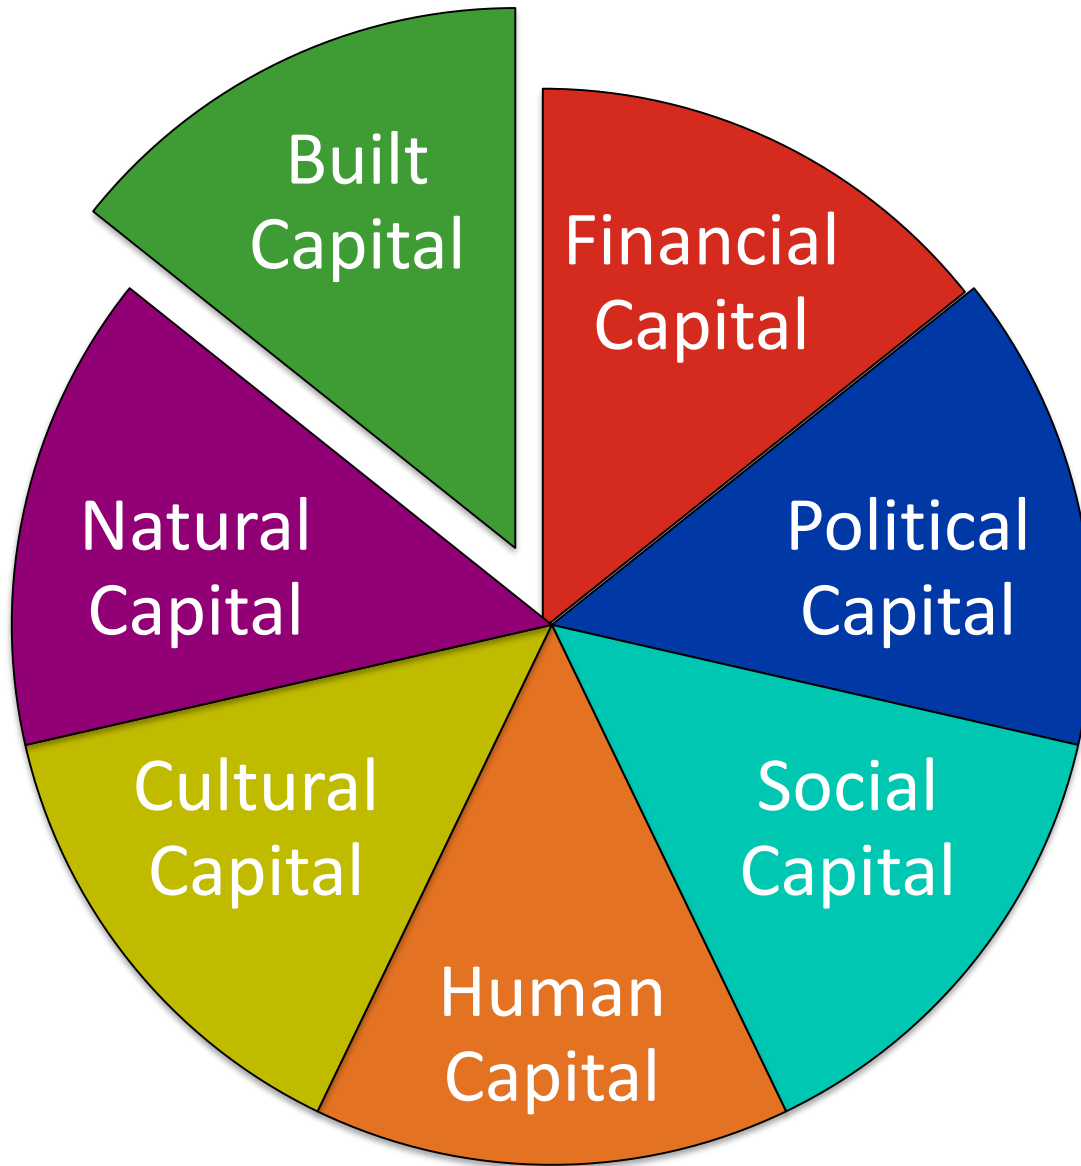

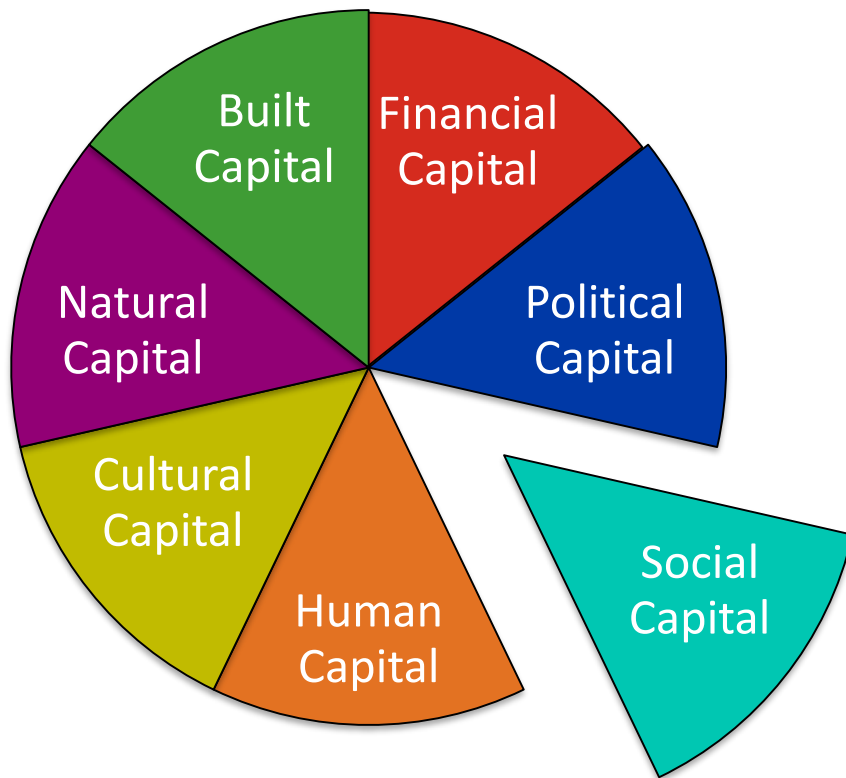

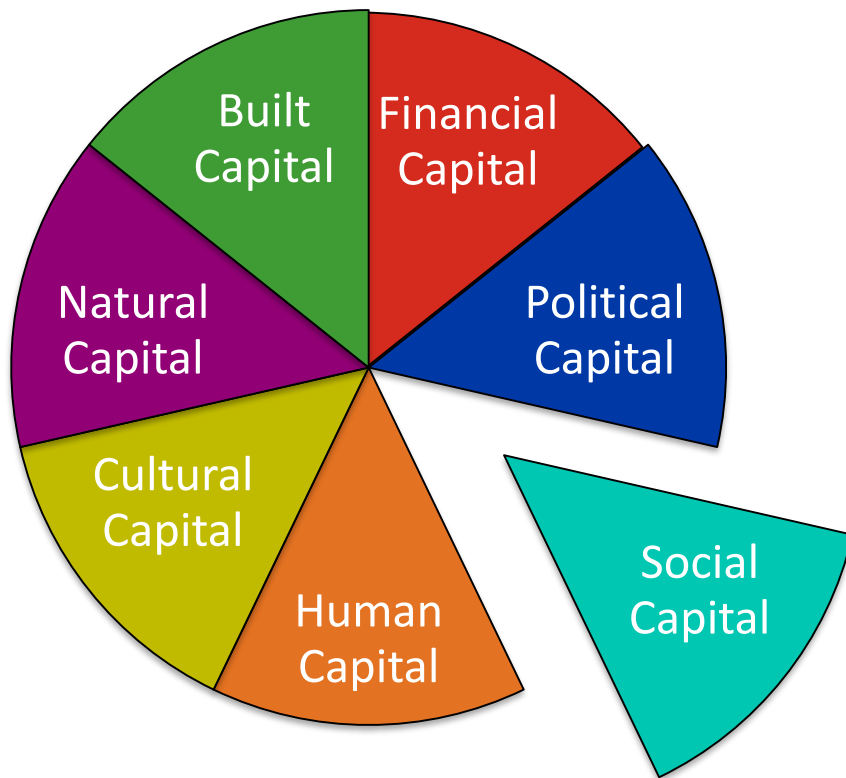

Part 2:
How does a person's history of residential mobility influence the likelihood of their willingness to dissolve social ties?

If a person doesn't have a strong history in the place they live, should we expect that they'll leave if the town is hit by a disaster?

**We are really freaking
excited about this research.**

Like, really excited.
