The landscape of volunteering is transforming

1. Practice of volunteering is changing

- Contraction of 'traditional' and expansion of 'modern' styles (McLennan et al 2016)

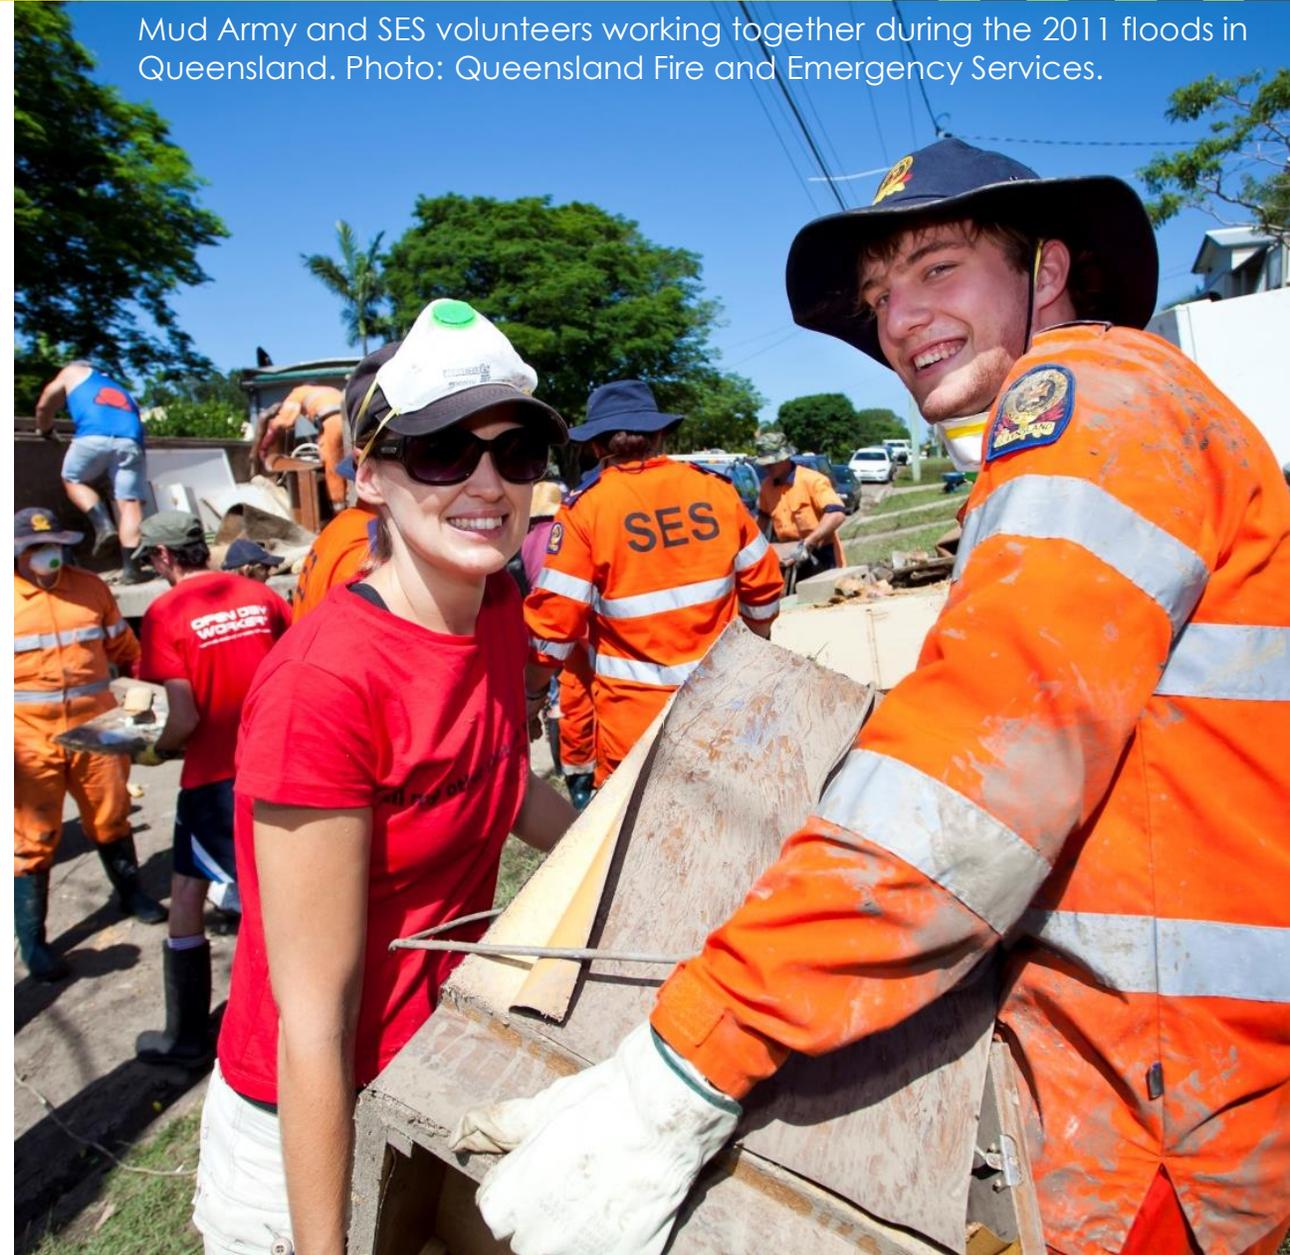

2. View of volunteering is broadening

- More inclusive definitions & measures (VA 2015, ABS 2018)

3. Expectations of volunteering are rising

- Formalisation & professionalization of volunteering & voluntary sector (Flint 2000)
- Building resilience through "volunteer initiatives rooted in the community" (UNV 2011)

Traditional volunteer management models are unsustainable

*“[Our change in thinking has] come from an understanding of where the national and international trends are going around sustainable volunteerism models and the emergence of new volunteerism groups and what makes them attractive. You look at that and go, ‘okay, here’s what we’re up against’. **Our traditional models will not survive in this area. So where do we need to go?**”*

Emergency Volunteering 2030 – Adapting the Sector

1. What might (and should) emergency volunteering look like in 2030 – before, during and after emergencies?
2. How, and by whom, might it be organised?
3. How can the EM sector best enable the value of this volunteering for communities over the next decade?

A foresight study

- “Foresight is a **systematic, participatory**, future-intelligence-gathering and medium-to-long-term **vision-building** process aimed at **enabling present-day decisions** and **mobilising joint actions.**” (For-learn 2018)
- **Developing alternative future scenarios and examining their implications for today’s decision making.**
- “In the longer run, it [scenario planning] can trigger **cultural change** in the way institutions and organisations approach their long-term future and make them **more adaptive to external changes.**” (Volkery & Ribeiro 2009)
