# Team Process Checklist

## PURPOSE

This tool is designed to provide a health check for teams, and if there is a problem, to help determine what that problem is. It assists people to think through three aspects of teamwork: communication, coordination and cooperation. If a ‘no’ response is recorded for any of the items this should be used as the starting point for a discussion with members of the team. Please note that while this tool is as comprehensive as possible, it will not detect all of the ways teams can become impaired.

## COORDINATION

- Are the roles and responsibilities of team members clear?
- Are actions always carried out as expected?
- Does everyone have a common understanding of information relating to the operation?
- Is there a clear and common purpose?
- Is everyone adjusting to meet the demands of the situation?
- Are team members requesting assistance from others, where necessary?
- Are team members correcting any mistakes made by others?
- Are any differences of opinion being resolved effectively?
- Is anyone creating unnecessary conflict?

## COMMUNICATION

- Is information being passed on in a timely manner?
- Is information being passed on accurately?
- Are team members ensuring that information has been received and understood by others?
- Are appropriate communication procedures being used?
- Are situation updates being provided?

## COOPERATION

- Does everyone show a willingness to work as a team?
- Do team members exhibit confidence and trust in each other?
- Is everyone following team objectives without opting for independence?
